Bacterial Gel Swabs

Bacterial Gel Swabs will be available for bacterial culture testing ONLY.

Please use Bacterial Gel swabs when requesting bacterial culture (MC&S) i.e. wound, skin, throat, nose, vaginal swabs for bacterial testing only.

Please order **Bacterial Swab 19046997**.

The Bacterial Gel swabs are NOT suitable for PCR/NAT testing (i.e. not suitable for COVID-19 testing).

This is a temporary measure to ensure continuity of bacterial testing occurs for our patients and clinicians.

Thank you for your assistance during this time.
